Inhalt/Contents

Abdulali, S.: Fields of definition for some Hodge cycles 289

Bae, S.: On the conjecture of Lichtenbaum and of Chinburg over function fields 417
Bárány, I.: Intrinsic volumes and f-vectors of random polytopes 671
Beck, J.: On a problem of W. M. Schmidt concerning one-sided irregularities of point distributions 29
Becker, R.: Sur les cônes faiblement complets, contenus dans un espace de Banach 99
Benkart, G., Gregory, T.: Graded Lie algebras with classical reductive null component 85
Birkenhake, C., Lange, H., Straten, D. van: Abelian surfaces of type (1,4) 625
Brown, G., Wilson, D. C.: A class of positive trigonometric sums. II 57

Chen, S. C.: Global regularity of the $\bar{\partial}$-Neumann problem on circular domains 1
Colzani, L., Giulini S., Travaglini, G.: Sharp results for the mean summability of Fourier series on compact Lie groups 75
Cowling, M., Fendler, G., Fournier, J. J. F.: Variants of Littlewood-Paley theory 333

Dancer, E. N.: On the influence of domain shape on the existence of large solutions of some superlinear problems 647

Fendler, G. → Cowling, M.
Fenske, C. C.: An index for periodic orbits of functional differential equations 381
Fournier, J. J. F. → Cowling, M.
Furushima, M.: Normal affine surfaces properly dominated by $\mathbb{C}\times\mathbb{C}^*$ 353

Giulini, S. → Colzani, L.
Gregory, T. → Benkart, G.
Gröger, K., Rehberg, J.: Resolvent estimates in $W^{-1,p}$ for second order elliptic differential operators in case of mixed boundary conditions 105

Heinzner, P.: Kompakte Transformationsgruppen Steinscher Räume 13
Hélein, F.: Approximations of Sobolev maps between an open set and an Euclidean sphere, boundary data, and singularities 125
Hernández, R.: Varieties of cuspidal curves in $\mathbb{P}^r$ 593
Holland, F., Walsh, D.: Criteria for membership of the Besov spaces B^s_{pq} 571

Iwashita, H.: L_q—L_r estimates for solutions of the nonstationary Stokes equations in an exterior domain and the Navier-Stokes initial value problems in L_q spaces 265

Jaffe, D. B.: On set theoretic complete intersections in $\mathbb{P}^3$ 165
Jaffe, D. B.: On set theoretic complete intersections in $\mathbb{P}^3$ (*Erratum*) 700
Jarnicki, M., Pflug, P.: The Carathéodory pseudodistance has the product property 161

Kahn, C. P.: Reflexive modules on minimally elliptic singularities 141
Kanenobu, T.: Relations between the Jones and Q polynomials for 2-bridge and 3-braid links 115
Kellerhals, R.: On the volume of hyperbolic polyhedra 541
Klingen, H.: Über Kernfunktionen für Jacobiformen und Siegelsche Modulformen 405
Kobayashi, T.: Proper action on a homogeneous space of reductive type 249
Kröger, P.: Harmonic spaces associated with parabolic and elliptic differential operators 393

Lalonde, F.: Classes caractéristiques isotropes 343
Lange, H. → Birkenhake, C.
Lorenzini, D. J.: Arithmetical graphs 481

Matsuoka, T., Sakai, F.: The degree of rational cuspidal curves 233
Menal, P., Vaserstein, L. N.: On subgroups of Gl_2 over non-commutative local rings which are normalized by elementary matrices 221
Min-Oo, M.: Scalar curvature rigidity of asymptotically hyperbolic spin manifolds 527

Pflug, P. → Jarnicki, M.

Raghunathan, M. S.: Principal bundles on affine space and bundles on the projective line 309
Rehberg, J. → Gröger, K.

Sakai, F. → Matsuoka, T.
Satoh, T.: Jacobi forms and certain special values of Dirichlet series associated to modular forms 463
Scholl, A. J.: On modular units 503
Shapiro, M.: A geometric approach to the almost convexity and growth of some nilpotent groups 601

Skowroński, A.: Selfinjective algebras of polynomial growth 177
Straten, D. van → Birkenhake, C.

Thill, M.: Exponentially bounded indefinite functions 297
Travaglini, G. → Colzani, L.
Tsai, I.-H.: Negatively curved metrics on Kodaira surfaces 369

Vaserstein, L. N. → Menal,P.

Walsh, D. → Holland, F.
Wilson, D. C. → Brown, G.
Wrobel, V.: Stability and spectra of C_0-semigroups 201

Xu, C.: The existence of nonclassical asymptotic expansion of the trace of a heat kernel for a degenerate elliptic operator 447

Yaméogo, J.: Sur l'alignement dans les schémas de Hilbert ponctuels du plan. La famille des N-uplets de $\mathbb{P}^2$ contenant au moins r points sur une droite 511
